

Artlysoft Private Limited

**Full Stack Python & Java
Online Training Program**

Build Industry-Ready Full Stack Developers

About Artlysoft Private Limited

Artlysoft Private Limited is a technology-driven IT services and consulting company focused on software development, DevOps, AI-enabled solutions, and enterprise IT consulting. Our mission is to bridge the gap between academic knowledge and real-world industry requirements by delivering practical, job-oriented training programs.

We design our training programs with direct input from industry professionals, ensuring learners gain hands-on experience and become deployment-ready. With a commitment to excellence and innovation, Artlysoft has established itself as a trusted partner for organizations seeking quality IT services and skilled talent development.

Our training philosophy centers on three core pillars:

Practical Application

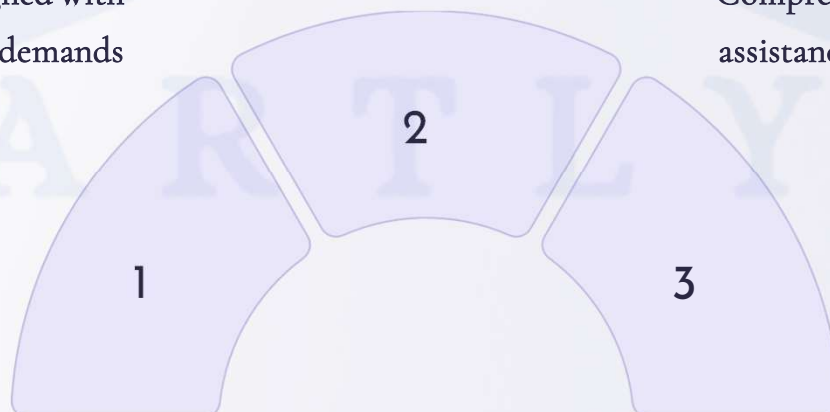

Real-world projects and case studies

Industry Relevance

Curriculum aligned with current market demands

Career Support

Comprehensive placement assistance and mentorship

Program Overview

The Full Stack Python & Java Online Training Program is a comprehensive, career-focused program designed for students, fresh graduates, working professionals, and career switchers who aspire to become full stack developers.

This program covers both backend and frontend development, real-time projects, industry best practices, and deployment fundamentals. Learners will build complete, production-ready applications using modern development practices.

Program Format

100% Online (Live Instructor-Led Sessions)

Program Duration

6 Months (Flexible scheduling available)

Learning Hours

350+ hours of instructional content

Batch Size

Small cohorts (15-20 students) for personalized attention

Key Highlights

1

Industry-Oriented Curriculum

Designed with input from senior developers and tech leads

2

Live Interactive Online Classes

Real-time doubt clarification and hands-on guidance

3

Hands-on Coding & Real-Time Projects

Build 5+ complete projects during the course

4

Case Studies & Capstone Project

Work on enterprise-level application development

5

Resume Preparation & Interview Support

Professional resume building and mock interviews

6

100% Placement Assistance

Job referrals through our partner network

7

Lifetime Access to Learning Materials

Recorded sessions and resources available forever

8

Mentorship from Industry Professionals

Learn from developers with 5+ years of experience

9

Suitable for All Levels

Beginners, career switchers, and professionals welcome

10

Certificate of Completion

Recognized credential for job applications

Why Choose Artlysoft?

Real Industry Exposure

Our curriculum is constantly updated based on market trends and feedback from industry partners. You'll learn technologies that companies are actively hiring for right now.

Project-Based Learning

Instead of just theory, you'll build real applications from day one. Our project-based approach ensures you have a portfolio ready by the time you finish the course.

Mentorship from Experienced Professionals

Learn directly from developers and architects working in top companies. Get insights into industry practices, best coding standards, and career growth strategies.

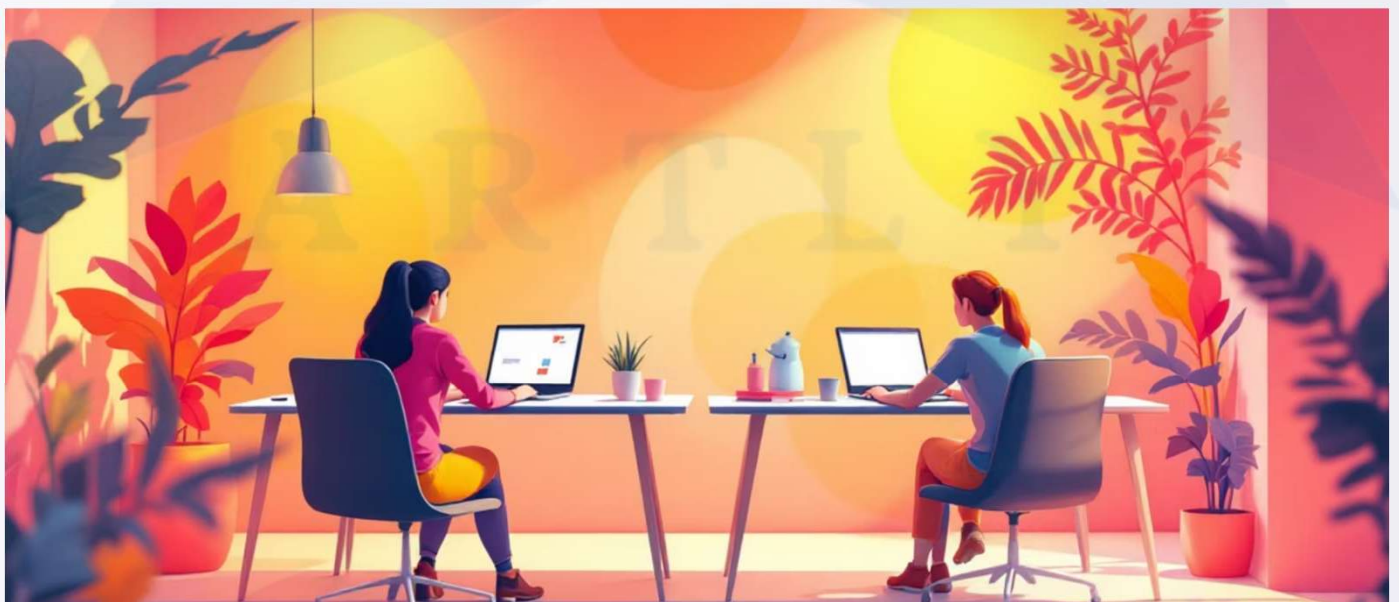

Career-Focused Support

From resume building to interview preparation, we support every step of your job search journey.

100% Online Flexibility

Study from anywhere, at any time. Balance your learning with work or other commitments.

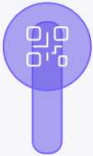

Learning Path

Our structured learning approach ensures progressive skill development:

Stage 1: Conceptual Foundation

Build strong fundamentals in programming concepts, data structures, and object-oriented programming.

Stage 2: Hands-on Coding Sessions

Engage in live coding sessions where instructors demonstrate real-world problem-solving techniques.

Stage 3: Assignments & Assessments

Complete regular assignments to reinforce learning and track your progress.

Stage 4: Real-Time Project Development

Work on mini-projects that mirror industry applications and best practices.

Stage 5: Capstone Project

Develop a complete full-stack application from requirements to deployment.

Stage 6: Interview Preparation & Soft Skills

Learn interview techniques, communication skills, and professional development essentials.

Stage 7: Placement Assistance

Receive job referrals, profile optimization, and ongoing career guidance.

Technology Stack Covered

1

Frontend Technologies

- HTML5: Semantic markup, forms
- CSS3: Flexbox, Grid, responsive design
- JavaScript: ES6+, DOM manipulation, async programming
- Bootstrap: Responsive grid system
- React.js: Components, state management, hooks

2

Backend Technologies

- Python: Core concepts, OOP
- Core & Advanced Java: OOP, multi-threading, design patterns
- Spring & Spring Boot: REST APIs, microservices
- RESTful APIs: Design principles, endpoint development
- Microservices Architecture: Service-oriented design

3

Database & Tools

- MySQL: Schema design, queries, optimization
- PostgreSQL: Advanced features, JSON support
- Git & GitHub: Version control, collaboration
- Docker Basics: Containerization, image creation
- Deployment Fundamentals: Cloud platforms, CI/CD

Who Can Apply

Students & Fresh Graduates

- Looking to start a career in software development
- Want practical experience before entering the job market

Career Switchers

- Professionals from non-IT backgrounds interested in development
- Existing IT professionals looking to upskill in full stack development

Working IT Professionals

- Wanting to expand their skillset
- Aiming for career growth and better opportunities

Non-IT Background Candidates

- Passionate about coding and technology
- Willing to invest time in learning and practice

Career Opportunities

Full Stack Developer

Design and develop complete web applications

Java Developer

Develop enterprise-level applications

Software Engineer

Work on complex software systems

Python Developer

Build backend services and automation tools

Backend Developer

Focus on server-side logic and databases

Average Starting Salary Range: ₹4.5 - 7 LPA (subject to experience and performance)

Job Market Demand

Full stack developer roles are among the most in-demand positions in India's IT industry. Companies actively seek graduates with hands-on project experience and modern technology expertise.
